SUMMARY

IT professional with 7+ years of technical support and systems experience at Apple and Comerica Bank. Currently provides Tier 1–3 support for 1,000+ users across 30+ banking centers as the sole Mac technician in California, managing devices with Jamf Pro and SCCM/MECM and user access through Okta and Active Directory. At Apple, built an internal reporting tool that cut report creation from 10 days to 2 and held a 100% customer satisfaction rating for a full year. Jamf Certified Associate and Google Cybersecurity certificate holder, bilingual in English and Spanish.

SKILLS

Endpoint Management: Jamf Pro, SCCM/MECM, MDM policies and configuration profiles, macOS and Windows imaging, OS patching, software deployment

Identity and Access: Active Directory, Okta (SSO), onboarding and offboarding, account provisioning

ITSM: ServiceNow, Incident Management, Change Management, Problem Management, SLA management, root cause analysis

Development and Automation: Python, HTML, CSS, PowerShell, Bash, Power Automate, Microsoft Forms

Productivity and Collaboration: Microsoft 365, Excel, Microsoft Teams, remote support tools

Platforms: macOS, Windows, iOS, iPadOS, watchOS

Languages: English (native), Spanish (native)

PROFESSIONAL EXPERIENCE

Infrastructure Operations Analyst III

Comerica Bank | Southern California | August 2024 – Present

Support and Incident Management

- Provide Tier 1, Tier 2, and Tier 3 technical support for 1,000+ users across 30+ banking centers and 3 corporate offices spanning Orange County, San Diego, and the Inland Empire, averaging 35 tickets per week.
- Manage the ServiceNow ticket queue to meet SLAs, handling incident, change, and problem management from intake through resolution.
- Serve as the escalation point for complex hardware, software, and network issues, performing root cause analysis to prevent repeat incidents.
- Serve as the sole Mac technician in California, supporting macOS users across all regional banking centers and corporate offices.
- Deliver executive and VIP support, prioritizing fast resolution for leadership.
- Monitor system alerts and troubleshoot LAN, Wi-Fi, and connectivity issues affecting branch operations.
- Participate in on-call support and business continuity testing to keep banking operations running.

Endpoint and Device Management

- Image, configure, and deploy macOS and Windows devices using Jamf Pro and SCCM/MECM.
- Manage MDM policies, configuration profiles, OS updates, and patching to keep endpoints secure and compliant.
- Package and deploy software across the Mac and Windows fleets.
- Manage hardware refresh and device lifecycle, maintaining on-hand inventory of 150 Dell laptops and 10 Macs.
- Conduct monthly device inventory audits in Excel and deliver audit reports to managers across assigned locations.
- Resolve hardware break/fix issues and support printers, peripherals, and conference room AV across all sites.

Identity and Access

- Handle onboarding and offboarding, provisioning accounts in Active Directory and managing SSO application access through Okta.

Automation and Process Improvement

- Built an automated device refresh workflow using Microsoft Forms and Power Automate that surveys users and automatically emails those eligible for a hardware upgrade.
- Write knowledge base articles and technical documentation to standardize troubleshooting across the team.
- Train other technicians on tools, processes, and troubleshooting.
- Provide budget and cost support for hardware and software purchases.

Office Buildouts and Projects

- Delivered IT setup for corporate office buildouts in Phoenix, AZ (Biltmore), San Diego and Downtown Los Angeles, CA, and Monterrey, Mexico, deploying laptops, monitors, and peripherals.
- Assisted the network team with troubleshooting during office buildouts to get sites operational.
- Coordinated with vendors on pickup and disposal of retired electronics during office transitions.
- Partnered with project coordinators and other business teams, joining status meetings to keep buildouts on schedule.

Software Engineer, IT Governance & Planning

Apple Inc. | Remote | September 2023 – August 2024

Application Development

- Built Project Attenborough, an internal web tool that turned report data into HTML reports for managers and senior executives, cutting report creation time from 10 days to 2 (an 80% reduction).
- Built internal web tools, dashboards, and reports with HTML, CSS, and Python to support the team's security, privacy, compliance audit, and access review work.
- Built dashboards and reports that gave leadership visibility into IT planning and governance work.
- Wrote Python scripts to automate recurring tasks.

Delivery and Support

- Gathered requirements from stakeholders to define features for internal governance tools.
- Tested and deployed new features to production and wrote documentation for the tools.
- Supported tool users, including managers and senior executives.

Genius Admin (Team Lead)

Apple Inc. | Santa Monica, CA | February 2021 – September 2023

Repair Operations

- Led a 3-person repair room team, overseeing daily operations and performing hardware repairs across iPhone, iPad, Mac, Apple Watch, AirPods, and Apple TV.
- Quality-checked completed repairs before release to ensure devices were fully functional.
- Coordinated up to 150 customer repair pickups per day, verifying repairs, contacting customers, and managing case notes.
- Supported yearly new device launches at the store.

Customer Support

- Diagnosed product issues on the spot and explained repair options, determining whether devices needed repair or replacement.
- Kept customers informed on repair status and resolved customer service issues throughout the repair process.
- Shipped devices to Apple's repair depot when in-store repair wasn't possible.

Inventory and Operations

- Tracked service repair inventory with the Operations team, including replacement iPhones across multiple models and repair parts.
- Sourced out-of-stock parts from nearby Apple Stores or through will-call orders to keep repairs moving through the queue.
- Ordered replacement consumables and processed parts returns.
- Managed end-of-month and new-month paperwork, CRU (customer replaceable unit) paperwork, and document storage.
- Supported loss prevention through inventory checks, process audits, and report reviews.

Leadership

- Mentored coworkers and trained new team members on repair processes and tools.

AppleCare Advisor (Help Desk)

Apple Inc. | Remote | March 2020 – February 2021

Technical Support

- Provided Tier 1 and Tier 2 remote technical support by phone for consumer, business, and enterprise customers across the full Apple product line, including iPhone, iPad, Mac, Apple Watch, AirPods, and Apple TV.
- Maintained a 100% customer satisfaction rating (North Star metric) for a full year, tracked through regular performance reviews with team lead.
- Diagnosed and resolved hardware and software issues across iOS, iPadOS, macOS, and watchOS using remote diagnostics and screen sharing.
- Researched internal knowledge base resources in real time to resolve issues accurately during live calls.
- Documented cases thoroughly and escalated complex issues through proper channels for smooth handoffs.
- Mentored new advisors on troubleshooting, tools, and support best practices.

Accounts and Security

- Resolved Apple ID and iCloud account issues, including password resets, two-factor authentication, and account security.
- Troubleshot Apple services and subscription issues for customers.

Setup, Data, and Repair

- Guided customers through product setup, backups, restores, and data transfers between devices.
- Set up mail-in depot repairs during COVID-19 retail closures, keeping repairs moving while in-store service was unavailable.
- Explained warranty and AppleCare coverage to set clear expectations on repair options.

Operations Specialist

Apple Inc. | Santa Monica, CA | March 2019 – March 2020

Inventory and Asset Management

- Managed inventory for 15,000 high-value Apple assets, tracking each item from arrival to sale or return.
- Ran regular cycle counts and targeted audits to catch discrepancies early and reduce loss.
- Reached 98.25% inventory accuracy by coaching the 150-person store team on how shrink affects the business.
- Followed Apple's security standards for receiving, storing, and handling third-party logistics (3PL) deliveries.

Device Management

- Managed 800+ MDM-enrolled demo devices through RIO, keeping each one set up and ready for customers.

Operations and Training

- Trained team members on inventory processes and simplified daily workflows.
- Forecasted and ordered store supplies to cover daily operations and busy seasons.

Best Buy

Culver City and Hawthorne, CA

Sales Associate (Home Networking) | July 2016 – March 2019

- Helped 40–100 customers a day find the right networking gear, recommending routers, modems, mesh Wi-Fi, network storage, smart home devices, and security cameras based on their home and coverage needs.
- Explained network setup and Wi-Fi coverage and troubleshot customer connectivity issues.
- Served as the store's designated Apple Master, the go-to resource for Apple product questions, which led to a role at Apple.

Sales Associate (Computers) | September 2013 – March 2016

- Recommended laptops, desktops, tablets, printers, and software, including antivirus, guiding customers through Mac vs. Windows choices and handling basic troubleshooting.

Across Both Roles

- Recognized as a top seller in the department and hit or beat monthly sales goals, which were raised each year based on prior-year results.
- Trained new associates and served as the go-to person for tech questions.
- Recommended Geek Squad services, protection plans, memberships, and credit cards based on customer needs.
- Covered other departments, including Cameras and Home Theater.

- Set up demo displays, restocked inventory, handled register and returns, and supported product launches.

CERTIFICATIONS

Jamf Certified Associate – Jamf Pro | Jamf | September 2026

Covers Jamf Pro administration and Apple Automated Device Enrollment (ADE).

Google Cybersecurity Professional Certificate | Google (Coursera) | January 2024

8-course program covering network security, Linux, SQL, Python automation, NIST frameworks, and incident detection and response.

ADDITIONAL COURSEWORK

Meta (Coursera) | 2023

Programming in Python, Version Control (Git), Introduction to Front-End Development, Introduction to Back-End Development

EDUCATION

California State University, Northridge | Coursework toward B.A. in Political Science

West Los Angeles College | Associate in Arts for Transfer (AA-T), Political Science
